DR. MARTIN LUTHER KING, JR. ELEMENTARY SCHOOL-COMMUNITY GARDEN, Providence, RI

Project Description

GCD designed and built a school-community garden hybrid at this Providence Public Elementary School. We manage the Community garden and run the school garden program. Students plant their gardens at Field Day in the spring and hold harvest celebrations when they return in the fall. Fifth graders plant the “Garden of Plenty” which provides fresh produce to food-insecure families in the school community throughout the growing season, including a Thanksgiving harvest. Community garden members care for the school garden during the summer.

Project Date

2011-ongoing
